

Meter Administrator Service

Power Data Associates is the leading provider of Meter Administrator services in Great Britain

About Us

Power Data Associates is the leading provider of Meter Administrator services in Great Britain. We are entrusted to calculate over 100 customers' unmetered electricity consumption, equating to an annual energy bill of over £154 million. When it comes to validating energy invoices worth millions of pounds, we can provide you with complete confidence that the values are right. Small percentage errors in the bills could cost you thousands of pounds, so it is vital that these sums are done accurately and in a clear, transparent way.

Working together with industry

By working closely with the ELEXON Unmetered Supplies User Group (UMSUG), the Institution of Lighting Professionals (ILP), the wider unmetered industry and our customers, we have developed a market leading service tailored to meet your needs. We work hard to keep up-to-date with all the latest key industry developments such as the Carbon Reduction Commitment, Distribution Use of System charges, the "500W rule" and many more. This information then gets passed on direct to you as our customer, in the form of a clear and concise guidance note. Where relevant, we will calculate the financial impact for you as an individual customer.

It is easy to get overwhelmed with too much information, we help distil the mass of industry information that is

available and provide you with the critical key points that you need to know to make informed decisions.

Experience

Our years of 'real world' operational experience, dedicated staff and specialist knowledge underpins everything that we do. Our service helps to ensure that all of our customers are able to manage their unmetered supplies in the most efficient and cost effective way possible.

Our customers cover the length and breadth of Great Britain with a multitude of different operational requirements, from major capital cities and towns to more rural authorities. Our customers invest in a range of energy saving solutions from Central Management Systems, part night photocells, part night dimming, Multi Level Static Dimming to LEDs, white light and new traffic signal technology. We ensure the investment our customers have made, achieves the energy and financial savings they expect.

Benefits of being independent

Power Data Associates is not associated with any Energy Supplier or Distribution Business allowing us to provide completely independent and impartial advice to our customers.
