

## Unmetered Information Service

**The unmetered supplies arrangements are constantly evolving. Ensure your organisation is ahead of the curve with our unrivalled unmetered information service**

Power Data Associates is uniquely positioned in the unmetered supplies market. As a member of the ELEXON Unmetered Supplies User Group (UMSUG), the Institute of Lighting Professionals (ILP) and other key industry working groups, we are fully engaged with industry developments that impact the unmetered supplies arrangements.

It is vital for organisations with unmetered supplies, or those who procure unmetered energy, to be aware of key industry consultations so they can express their views. Previous consultations have included:

- defining what qualifies for an unmetered supply,
- the treatment of unmetered supplies under the Carbon Reduction Commitment, and
- changes to the Distribution Use of System charges.

An example of an important industry consultation was the '500W rule' where most responses to the National Measurement Office were from the street lighting industry. Equally impacted were energy procurement organisations and customers with unmetered equipment nationwide, ranging from telecommunications, outdoor advertising, to wi-fi networks. PDA can ensure that you are aware of all relevant consultations.

Other topics include the ELEXON load research programme which changed the amount of energy that had to be procured; also changes to the Distribution Use of System charging methodology which had a significant impact on energy costs.

### How we deliver

PDA believe that information is at the heart of good unmetered energy management. We keep every customer up-to-date with the very latest key industry developments and explain how these will impact on your budget. We work closely with your organisation to understand your specific requirements and design a bespoke service tailored to your needs.

Customers can request any combination of the following:

- Industry updates – emails and guidance notes
- Assess impact of industry change on your organisation
- Consultation alerts
- Review of consultation responses

- Knowledgeable, helpful and friendly support
- On-going knowledge base

We also provide a popular half day workshop which will be tailored to meet your needs. This could include:

- Overview of the unmetered arrangements
- Verifying billing and procurement of unmetered energy
- Carbon Reduction Commitment and impact on unmetered supplies
- Managing an accurate equipment inventory
- Introduction to Central Management Systems
- Understanding the PDA customer reports
