

Environmental Policy

Power Data Associates Ltd is fully committed to minimising the impact of its activities on the environment.

Power Data Associates will meet all environmental legislation that relates to the company.

Power Data Associates will strive to:

- Minimise waste by managing operations to ensure they are as efficient as possible
- Promote a purchasing policy which favours those products and services which cause the least harm to the environment
- Promote recycling
- Reduce the consumption of primary raw materials (including fossil fuels, water and energy)
- Use modes of transport which minimise environmental impact

Our management system applies to all activities of the company.
